

- The ridged design on the handle ensures a firm grip.

- The pik removes food particles, helping prevent gum disease.

### FP13 Flosser Pik

- The unique fine flat floss makes it easy to slide into tight gaps between teeth, where conventional floss has difficulty.
- The extra wide floss removes food particles and plaque between teeth more effectively, giving better cleaning.

- Made from 100% safe active liquid silicone rubber, which meets with the FDA standard.

- Its super soft, flexible bristles cleans and massages baby's teeth and gums gently, relieving discomfort during teething.

### Infant toothbrush

- The specially designed strip along the top of the finger cap helps to prevent baby from biting fingers.

### IB307 Interdental Brush

- After cleaning the brush, replacing the cap keeps it hygienic.

- Clipping the cap on the end of the handle extends the length, making it easy to grip and use.

- The rubber material and super flexible design makes it easy to bend into L shape, resulting in better cleaning of the back teeth.

- The rubber ensures a firm grip. The flat surfaces of the handle can be used for customer's logo on both sides.
