

PTFE Floss Pick / Flosser

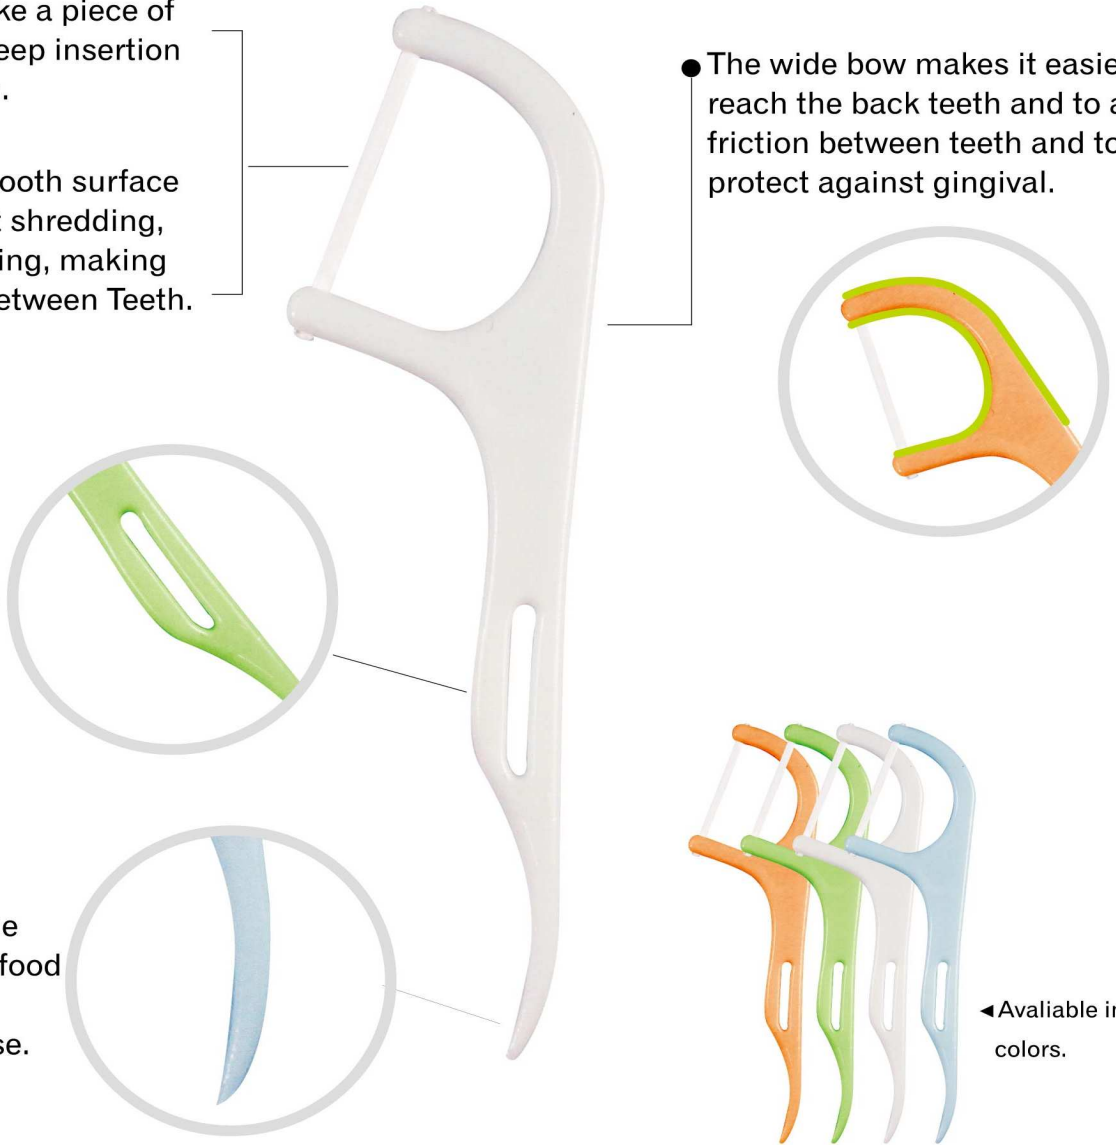

FP16

- The filament thin like a piece of paper, perfect for deep insertion between tight teeth.
- The unique fine smooth surface helps resist against shredding, snapping and sagging, making it easy to slide in-Between Teeth.

- The wide bow makes it easier to reach the back teeth and to avoid friction between teeth and to protect against gingival.

- Easy-grip handle with thumb pad for better control.

- The sharp end of the floss pick removes food particles, helping prevent gum disease.

◀ Available in most colors.
